

Do IT Justice

Intelligent IT for the modern law firm

The five biggest challenges for IT leaders in law firms

1

Legal productivity boom

The advent of AI and new technologies promises unprecedented efficiency, leaving behind firms that fail to adapt.

OneAdvanced leverages intelligent automation and decades of legal tech experience to enhance efficiency, reduce administrative overhead, and free up legal professionals to focus on maximising billable hours.

AI tools can automate up to 44% of tasks currently performed by legal professionals, significantly enhancing productivity and efficiency.

Data security and cyber threats

Increasingly sophisticated cyber-attacks threaten client confidentiality and firm reputation.

OneAdvanced implements robust cyber security measures and continuous monitoring, ensuring your firm's data is protected against emerging threats.

2

The number of reported cyber breaches at UK law firms jumped by 36% in 2022/23.

3

Technological integration

Outdated systems hinder efficiency and responsiveness.

OneAdvanced delivers modern, scalable IT solutions that integrate seamlessly with the unique needs of legal firms, enhancing operational efficiency and client service.

56% of law firms experience issues with system integration, leading to inefficiencies and data silos.

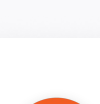

Regulatory compliance

Keeping abreast of evolving regulations and ensuring compliance across multiple professional and technological domains is critical to avoid fines.

OneAdvanced offers state-of-the-art data protection and privacy expertise to ensure compliance with legal regulations, helping firms manage data and assess risks effectively.

4

The ICO can fine up to 4% of a company's total annual worldwide turnover or £17.5 million for negligent treatment of client data.

5

Client expectations

Rising demand for transparency, speed, and personalised service.

OneAdvanced delivers exceptional user-experience, giving time back to your lawyers, allowing them to deliver better client service.

Efficient legal services lead to higher client satisfaction and recommendations, with a 20% increase in both metrics when clients rate a firm as efficient.
